RESPADRIL

Plant extracts and readily assimilated copper (IPALIGO® trace element)

www.equistro.com

EQUISTRO®

RESPADRIL is a complementary feeding stuff for horses containing plant extracts and readily assimilated copper (IPALIGO® trace element).

RESPADRIL supports the normal function of the respiratory system.

The extensively researched plants contained in RESPADRIL are known for their respiratory tract virtues. The aromatic essences and plant extracts can aid respiratory comfort allowing the horse to feed normally. Licorice can support the natural self-cleansing process and mucus formation in the upper and lower respiratory tract. Oregano, Pine and Eucalyptus aid the resistance and natural regeneration of the respiratory tract.

Copper is a biological antioxidant and in RESPADRIL it is bound to amino acids, which ensure rapid assimilation.

USAGE

Supports the normal function of the respiratory system.

PACKAGING

250 ml & 1000 ml bottle

ADMINISTRATION

Horses (500 kg): 40 ml per day for 5 days.

Foals and ponies: 20 ml per day for 5 days.

Give with food, drinking water or directly in the mouth.

COMPOSITION

Sugar, 1,2 Propanediol.

Additives/Kg: Compounds of trace elements; Copper (II) chloride dihydrate (3b403) 800 mg. Aromatic: Glycyrrhiza glabra extract 56000 mg, Essential Eucalyptus oil 12000 mg, Essential Origanum oil 4000 mg, Essential Pine oil 4000 mg, Glycine (2b17034) 2000 mg.

Analytic constituents: Moisture 45%, Crude Fibre 0.5%, Crude Ash 0.5%, Crude Protein 0.5%, Crude Fat 0.5%, Sodium 0.2%.
